HAMMER-KNIFE MOWER

## ***HM1560K***

BARONESS is the global brand of Kyoisha Co. Ltd.

# SIMPLICITY AND EFFICIENCY ARE KEY ATTRIBUTES OF OUR HAMMER-KNIFE MOWER RANGE.

With hydrostatic drive and rubber track steering, the Baroness HM series is kind to the ground surface and safe on slopes.

The ability of the HM1560K to reduce brush and shrub to a smooth mulch whilst working on gradients and terrain where few would dare to tread is simply amazing!

A tried and tested concept that has been in production for many years in our home market of Japan, the HM1560K offers outstanding solutions to slope mowing problems and has been fully approved by Network Rail in the UK.

Fitted with a powerful 38 hp Kubota diesel engine, automatic self-leveling working platform, and the track system not only provides excellent stability on slopes, but low ground pressure and superb traction even in the wettest of ground conditions.

## EXCEPTIONAL SLOPE PERFORMANCE

Approved for use on sloping terrains up to a maximum of 35 degrees. The HM1560K is ideal for banks and slopes with thick growth and vegetation.

## SELF-LEVELING FOOTPLATE

The HM1560K has a self-leveling foot plate to give the operator a stable and secure stance, even when operating on steep inclines. The footplate can also fold-up, providing a walk-behind option.

Length	291 cm
Width	172 cm
Height	140 cm
Total Weight	1,635 kg
Engine	Kubota diesel 38 hp @ 2700 rpm
Fuel Capacity	Diesel 33 litres
Cutting Width	154 cm
Height of Cut Range	3 cm – 30 cm
Maximum Speed	6.5 km/h
Slope Rating*	35°
Ground Pressure	0.16 kg/cm <sup>2</sup>
No. of Flail Blades	120

\*maximum possible working angle for the machine is subject to ground conditions and the appropriate risk assessment by the owners and operators.
