

AgriMetal GR660 Unique Selling Points

BARONESS
Quality on Demand

Operator Comfort

- * Fully adjustable operator seat with arm rests as standard.
- * Soft touch steering wheel for added operator comfort.

Ergonomic Design

- * Hydraulically assisted steering to reduce operator fatigue.
- * Single hand steering operation for quick directional response.
- * High grip direction change pedals for enhanced control.

Powerful and reliable engine

- * Fitted with a 13hp Honda petrol engine.
- * Large fuel tanks provide a long operating duration.

Easy maintenance access

- * Easy access to all service areas to include the engine bay and the roller drives.

Advanced roller design

- * Each roller is made of hard-wearing steel which means there are no rubber coatings to become damaged or worn.
- * Each roller unit is driven by independent hydraulic drive motors which are connected in series to distribute flow and torque evenly.
- * The GR660 features floating steering heads which enable them to follow contours precisely over severe undulations, to provide a better putting surface with minimal compaction.

Speed and efficiency

- * The GR660 has a working width of 168cm which provides the best ratio between efficiency and contour following.
- * The overall weight of 515 kg is distributed through six steel rollers to provide an average ground pressure of 7.8 PSI which provides a good roll without excess compaction.

Roller Drive

- * All belt drive for reduced maintenance.
- * All belt guards are fully enclosed to reduce wear caused by contamination.
- * The GR660 has built in guides to ensure minimal overlap and maximum productivity.

Standard Equipment

- * The GR660 includes a purpose-built transportation trailer.

- * The trailer has a lift assisted tail ramp which is self-locking for additional roller security.

Additional Equipment

- * The GR660 comes with 2 LED working lights fitted as standard to enable early morning operations.
- * Optional pre-roller brushes are available that will remove dew and worm cast from the green, and brush top dressing into the turf.
